Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 October 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 25-29 are rejected under 35 U.S.C. 102(e) as being anticipated by
Cabrera et al.

Figure 8 of Cabrera et al discloses an optical component tray comprising: a plurality of cavities (the spaces occupied by elements 870 and 871); an area (the space for element 867) for winding optical fiber; and at least one optical fiber guide groove (the channels connecting elements 861 and 862 to the winding tray 867) extending between said area and each of the plurality of cavities.

The structure above reads on claim 25.

Claim 26 reads on the structure defined by elements 850, 851 and 852.

Claim 27 is taught by element 867.

Column 5, line 12 teaches claim 28.

Claim 29 reads on the complex passages in the drawing of figure 8.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 30-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cabrera et al.

The difference between the housing shown by figure 8 of Cabrera et al and the subject matter of claims 30-36 is that the structure that defines the fiber grooves, cavities, alternating openings, and partially hollow tubes shown in the drawing be made from an elastomeric distendable material.

Official notice is taken that it was common knowledge at the time of the present application to construct housings for optical components from moldable plastics.

The use of moldable plastics for the construction of the housing disclosed by figure 8 of Cabrera et al would have produced the subject matter of claims 30-36.

Claims 1-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
